Subject: Inquiry into Ecosystem Decline in Victoria - submission

Categories: Submissions

As a concerned citizen, born and bred in Victoria, I ask this government to put more resources and money into protecting Victoria's native wildlife, flora and fauna to stem the loss of biodiversity that is taking place more and more every day. We need to act now to protect our precious environment and its biodiversity. It is essential to implement strong environmental regulation for further land development and to counteract the effects of the recent devastating bushfires. We should be guided by science every step of the way. Before more species are lost we must act to protect and strengthen what remains.

Yours sincerely,

Pia Boutsakis
