Subject: Extinction Inquiry,

Hi,

I am writing to you to ask you to please do all you can to protect our native flora and fauna.
120 Victorian different animals and plants are on the brink of extinction.

It is so important for the health of our state that we maintain the nature biodiversity of our native species.
Victoria clears more land than any other state and the results for wildlife and plant life are devastating.

I would love to see a way to protect our animals and plants enforced , with tree planting and protected reserves that
can't ever be cleared for farming or buildings.

Kind Regards
Nicole

Nicole Groch
