Subject: Species Extinction

Categories: Submissions

Hello,

I am deeply concerned about the future of endangered species in Australia and the impending danger for all life on this planet if governments and the general public don't act quickly.

We have nine and a half years to stop fossil fuels and move to healthier, more sustainable energy sources.

You have the power to make the change on my behalf.

I'm really frightened for humanity and the thousands of incredible species going extinct while we sit and watch the fossil fuel industry endorsed by our government.

Please act quickly for the future of the planet.

Kind regards

Jane Wallace Mitchell
