

Inquiry Name: Inquiry into Nuclear Prohibition

Dr Leah McDermott

**SUBMISSION CONTENT:**

--

Nuclear energy in the form of SMR (small modular reactors) are the only safe, reliable, clean, efficient energy source we have available. While Australia's contribution to the world pollution via coal and renewable energy sources is small, we need to provide an example to larger polluters how good energy production can be achieved. The information on nuclear energy production available in 1983 when the Nuclear Activities (Prohibitions) Act was created is outdated and invalid.
