SUBMISSION CONTENT:

--

- * Public safety is the first responsibility of Government.
 - * There is well documented risk with all phases of the NUCLEAR FUEL CYCLE.
 - * sadly HUMAN ERROR is a fact of life.
 - * MENTAL HEALTH issues prevail in all levels of our society. Many persons do not receive appropriate/timely support.
 - * We face culture of misinformation, fear and suggestions of terrorism in everyday life.
 - * There is SIGNIFICANT RISK of breach of SAFETY MEASURES at any phase of the Nuclear Cycle.
 - * Aspirations for NET ZERO EMISSIONS by 2050 is vital: however SOUND TECHNOLOGY is already a realistic and cost effective way forward. (Refer to proposals of Ross Garnaut).
- The RISKS of nuclear far out way and benefits.
