Submission:

There has been many rejections previously made, objecting to the rezoning, clearing and building ghetto style 3 storey high housing on the former Kingswood Golf Course in Dingley Village. Over the last 5-6 years many times there has been strange chemical smell outside as my home as it is backed onto the former Kingswood Golf Course. I had suspected herbicides were used, the likes of industrial roundup to kill off the grass, fauna and flora in an attempt to make it look desolate, further intimidating the residents to give in to the proposed development. This is only one of the blatant environmental criminal acts on the part of Australian Super. We do not want the type of housing they are proposing whatsoever. KGC is a green space. We are asking for and need, fair and proper consultation and frankly a better solution. This property should never have been sold with what they have in mind, the zoning is there for good reason as the green space is so important right now, for the environment required for all, including animals, the birdlife and especially needed to stay green space to take up water during heavy rains. There has been many trees already removed, many i suspect illegally as they are removed during the night, in the early hours of the morning, this proposal is an environmental nightmare, we see the corruption that this proposal should never be considered or awarded.

we do not want our green space destroyed, we need the oxygen from all the established trees like never before, trees are life to us and the planet.
