**Your position or role:**

### YOUR SUBMISSION

**Submission:**

What a nightmare.

700+ dwellings minimum 2 cars 1500+ cars daily trying to exit said development onto an already congested road system. No public transport to cater for the extra mass.

No extra infrastructure {schools,playgrounds,shops,medical practices} to cater for the development.

This proposal has already been voted against by 8000+ residents...listen to their needs/ wants for a change,

They're the ones living in the area, not the developers raping the surrounding area,

Sounds like a total "smoke and mirrors" situation created by developers that didn't get what they wanted the first time around. Sounds good on paper..totally inappropriate for the area in reality.
