submission - to all concerned.

3b. I think it is very short sighted to do away with the Hamer government's legacy of the green wedge and replace the Delta site with an industrial train stable.

Some people are starting to wake up to the fact that the planet is in danger from human development and nature needs to be included in the environment as well, for the long term benefits. It makes more sense to put an industrial site in an industrial area, anyone can see that. The suburbs are growing hotter from the lack of trees and back yards.

3d. My father was one of the Rats of Tobruk and fought so that Australia's future generations could live in a democratic free state. Not so we could be dictated to about when we could or could not protest peacefully over issues that would make Melbourne a better place to live for everyone. If people don't stand up for what they believe in, then they deserve the government they get.

Regards,

Fay McNamara
