RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

Private enterprise has not been able to cope with the recycling crises and I strongly urge the government to take prompt action with this. The big supermarkets have made an effort in not giving out free plastic bags but I feel much more could be done to encourage people to reduce their use of disposable plastics. Governments have taken on the tobacco industry with great success and we need a similar campaign to change peoples attitudes to plastic. The first step is surely to offer a refund on bottles and cans.
