RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

I stayed at Philip Island just after Bass Council had rolled out their new recycling program (which includes 3 bins and a green waste program.) I took photos of these and their letters to residents to show Mornington Council but like most Councils, there are too many departments involved for any such changes to occur and/or any great working solutions from other Councils and Governments being shared.

I also recall a response about putting in a recycle cash for bottles scheme in Victoria as being too difficult and costing too much. Perhaps if those Victorian pollies who blocked it turned to the interstate pollies to see how it was set up in the other states, there could be a smooth transition.

Networking. Talking. We are all concerned about the state of our planet and it starts with the people and we all need to talk to share what is working and what won't or didn't!

I have photos available if anyone wants to see.

Oh and Albury has the cash for buying back those plastic bottles!
