RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

It's sad to see plastic rubbish in public spaces and know that our waste is going to landfill. It makes me really feel powerless and concerned for the future. I want to see reduce and reuse supported as a priority. Clearly people need help with that, so let's see some govt incentives and tax breaks. Let's tax single use plastic like we tax alcohol, and give tax breaks to zero waste and bulk stores so they are affordable. Let's look at new technologies, such as plastic and glass waste used in building roads. Let's be proactive and positive but also firm about single use anything - from toothbrushes to childrens toys.
