RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

To whom it may concern, when Aldi first launched in Australia with a policy of no single use bags to be provided- no one was concerned or felt deprived. In light of this, I feel that we don't place enough pressure or expectations on retail organisations to reduce their packaging and waste in the first instance. I believe policy is also required to back this up. The amount of packaging and waste from retail should be addressed primarily. Thankyou.
