RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

We need a local recycling solution. Instead of shipping out waste elsewhere, I want investment in our own industry that makes products out of recycled materials. More education on what can be recycled and how, and enforcing schools, institutions and corporations to have a verified recycling program. Banning single use plastics is a no brainer; and this must include the copious amounts of plastic wrapping waste produced by supermarkets. Force them to comply, they can afford it.
