RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

Many of us in this electorate live in properties where landfill and recycling bins are shared by multiple tenants. While some of us do our best to separate these into their respective bins, even rinsing the recyclables, there are others who either do not know or do not care about separating our trash, with the result that many of our recycling bins are probably "contaminated" and end up in landfill. I have no idea what the solution to this is, other than separate bins for each tenant.
