RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

We're doing the right thing by reducing, reusing and recycling, but we can't rely on sending our recycling overseas anymore and the old parties haven't set up a proper recycling industry here at home.

We can stop recycling going to landfill by increasing incentive to households, consumers and industry by introducing legislation on

- 10c refund on bottles
- banning unnecessary single use plastics
- investing in a recycling industry
- investing in compost collection and maintenance
