Subject: Addressing the recycling crisis in Victoria

RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

I am 1 of many who spends hours sorting recycling in to my "yellow lidded" bin to be collected each fortnight. My faith was automatic that my contribution would not go into landfill. I now feel quite disillusioned. Australia needs a reputable recycling system - container deposit scheme, a solution for harder plastics such as medicine bottles, toothbrushes and plastic tubes.

The impact of a failing system to me is clear. What kind of world are we passing on? If there is no system why am I spending hours a fortnight washing out containers to be recycled (oops ... dumped in landfill) The government needs to get serious and develop a viable system.

I am a taxpayer and I vote.

To this end I will vote for those who take recycling and the environment seriously as it is an issue
