RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

As a parent to three children, I find myself becoming more and more aware of the environment that we are going to leave the next generations to deal with.

It blows me away that we live in a first world country that in 2019 has no true recycling industry. Shipping our waste to another country doesn't cut it.

It time to legislate and ban single use plastics as they have done in Europe.

I will be voting green now and going forward because of this single issue and the fact that our major parties have failed over the past three decades in creating an industry that is works
