Subject: We need to get better

RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

I work in an office that has separate waste and recycling bins but every evening I see them all being collected and thrown out together anyway and it upsets me. It's time to change the attitudes and individuals and big businesses to encourage recycling. We need a deposit scheme or something to get people to start changing their behaviour. I have by buying recycled toilet paper, having reuseable straws and bottles. We should be able to maintain a clean and sustainable state and be proud to say that we are. When you look at countries like Sweden, who are amazing at recycling, I feel so disappointed that Victoria is so behind.
