RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

Myself, our family and all our friends are so frustrated at the current state of the recycling system in Australia! For such a great country it's so disappointing that our systems are so backwards and outdated in this day and age, the entire process need a complete overhaul. Currently I have to take my soft plastics off-site to recycle, and the facilities/bins are only small and always full! I go to all the trouble to divide out my recycling in our home bins only to find out that they end up getting dumped in landfill anyway. There also needs to be penalties for people who do not recycle properly, to finally be able to action the change that's needed (we need to follow Europe's lead)!! The current system is no longer acceptable!
