Subject: Please take leadership on our recycling crisis

RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

Our consuming is at an all time high. Victoria could lead Australia & the world in managing our waste and reducing what we use.

Please help lead us to ban many of the single use products. We have a long way to go here.

We need to be able to set up a recycling plant in Victoria, let's charge other states to use it!

Put a return charge on glass, let's get them back to make into other products.

Let's innovate with a reducing waste (and maybe recycling) initiatives. Victorians are a smart bunch, please invest to forward fabulous ideas to rescue what we use or recycle waste.

Get big business to help, use your influence to get them on board.

Why not a Minister for Rs - reduce recycle reuse

Thanks for your time

This is a key issue that we can't leave to local government.

Lauren
