RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

Bass coast council have reduced landfill by 60% through smarter bins with displayed symbols of what to put in and providing compost bins and bags! Why don't we do this! Take green waste every week and landfill every second week. Promote a greater variety of recycling, promote biodegradable food wraps and disposable products. There are many simple solutions to this problem which can have a huge impact. There's no need to wait.
