Subject: Compost it or charge double

RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

Rotting food waste gives off methane and it's more than just bad smelling. Food waste needs to go into compost bins either your own or a public facility. Big dumpers of food waste into council tips should be charged double fees to encourage use of a public composting facility. Householders that have their own compost bins have a great product for the garden. This is why I personally operate eight compost bins at home. Follow my example and reduce methane madness.
