RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

We live in a modern and beautiful country, we should be so grateful to have some of the most unique natural landscapes in the world. We want to protect our environment for future generations.

We pay our taxes, council taxes and we put our trust into the government to spend that money on recycling and waste management. That's what we are told is happening, and we only find out now that most of our recycling is going into landfill?? This is disgusting, we have the resources and technology to fix this. And where is all of that money going? If it's not being used to recycle?

We need a plan and action for recycling centres, and proof our money is being used for this. A ban on single use plastics and a 10c refund for glass and cans.

Enough is enough.
