Subject: Don't make generalised choices for ME

RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

I know that recycling seems annoying and seemingly unimportant but that is not the case. Statistics and facts scientifically proven and researched, confirm it is helpful to our environment.

But my main gripe is that the government gets to make decisions that are generalised and poorly justified. Recycling and waste disposal should have been a high priority from the beginning of parliament but it wasn't due to a lack of knowledge of what the future would bring.

Please prioritise our mess and the disposal of it for our environment and further benefit.
