Thank you for the opportunity to contribute to the Recycling Inquiry.  
Firstly I would like to see standardized labelling for recyclable products. Eg: I buy icing sugar from Aldi in a plastic bag and it has the recycling logo! All packaging needs to be audited for its recycling ability.

Secondly I would like to see a returns system for plastic/glass drinks bottles, similar to South Australia.

Thirdly financial assistance to Public schools and hospitals to introduce effective recycling systems that are measurable, maintained and reviewed for their effectiveness.

Fourthly, there are numerous small businesses that are doing amazing things with recyclable products and turning them into usable products again. Lets support them and get their product recognized.

Lastly, whatever system you introduce I hope it sees us responsible for our own recycling. I dont see how sending it offshore to be recycled is responsible. Recycling is our problem. There is a push for Solar Energy, but I feel Recycling should be considered a necessity to the environment before Solar.

Thank you  
Peta Hoiles
