RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

I take my 3 beautiful kids to the beach most weeks and we are constantly collecting rubbish. I am trying to teach my children to do better than what is currently happening. They understand this and they are 7,5 & 3. Politicians either don't understand this or choose to ignore it. The only way we can make a change is to rally together. We all try and do our part by recycling but what good is it if it's going straight to landfill. Something needs to change because what we are currently doing isn't working. Enough is enough, we are desperate for a change. The earth and the animals deserve it. Growing up in Canada we have wonderful recycling & composting programs. It's not hard to do you just need to care enough and make the change.
