RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

Major concern for the waste of resources in developing and creating single use plastics and other materials and the loss of resources when they are dumped in landfill. Major concern for the waste that does not make it to landfill but instead ends up in our oceans. So many ecological implications. We need to encourage industry to make more recyclable packaging and take responsibility for its end of life. We need to support the recycling industry and offer more opportunity for using recycling. We need consistent recycling options and we all need to better value our resources including used packaging. For all this we need strong leadership, financial incentives and education!
