Subject: Making recycling easy

RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

I'm amazed that we don't have a clearer, universal system that makes recycling simple for everyone - there is too much confusion in what can and can't be recycled. I'd love to see Victoria become leaders in providing better recycling structures as well as the management of recyclable waste.

There also needs to be a bigger push to remove the amount of single use plastics at supermarkets and independent grocers.
