RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

I am very concerned about the lack of leadership on change in recycling and waste management in Australia. Australia need to make a firm decision in reducing the amount of unnecessary waste being allowed into the country. I believe Australia can make changes that will improve our lives and the state of the country. All levels of government need to step up and increase the ability to manage our waste by providing ways to recycle products within Australia and by reducing the amount of waste coming in.
