I would like to point out that the site at Devon crt was discovered 2 years ago and was attended by all relevant authorities when I met the boss of the epa in December this year I asked why nothing had been done to resolve the problem I which others present where shocked when she replied she knew nothing about the incident if she new nothing about the situation it doesn't say much about the epa and also who's given the information to the inquiry obviously what the want the inquiry to believe also my business in Devon crt is suffering financially. I have contacted the minister concerned and cat speak to her  
If you would like to discuss anything please feel free to contact me
