We live 7kms from the Ravenhall Landfill. There are days when the stench of rotting garbage is so awful that we can't be outside or have our windows open or even have clothes on the line. As a citizen living in a developed country with a wealth of resources why should I be subjected to this? Isn't it our right to have clean air? Why should it depend on my locality as to whether or not I, my family and friends are subjected to this?

We have so many forward thinking countries to look to as a positive example. Why are we continuing to choose this archaic waste management solution (A Landfill).

My hope is that the Ravenhall Landfill will not be allowed to extend and continue. Instead complete the remaining 5/6 years they have left on the life of the tip. And the timeframe that was initially granted.  
Kathryn Hall
