RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

It is appalling that a wealthy country like ours can't reduce and recycle our own waste. Firstly, we need to drastically reduce our use of single use plastics. We need a deposit scheme on cans and bottles. We need to encourage and incentivise companies to use re-cycled plastics where possible. Our council, Glen Eira, now does large-scale composting to divert food waste from landfill. Why is this not widespread. Apart from everything else, wouldn't an efficient recycling industry employ people !!
