Inquiry Name: Inquiry into Recycling and Waste Management

Mr Ken Savage  

## **SUBMISSION CONTENT:**

--

It is absolutely essential that we create a facility for recycling to be viable in this State. We can minimise waste going to landfill and create a viable recycling industry and the jobs that this would create. Manufacturers need to build the cost of recycling new materials into their pricing structure. This would Incentivise the use of as much recycled component as is possible.

Companies need to bear the cost of recycling of their packaging.

Inappropriate packaging of food needs to be banned. This also include plastic Supermarket bags.

People need to be educated on how to recycle and to reduce their reliance on packaging.

It should mandatory that food waste from supermarkets not go to landfill.

Sell by and use by dates need reviewing. They need to be sensible and appropriate.

Schemes which divert food waste to constructive use within the community need to be supported.

Deposits on containers need to be reintroduced to promote recycling.
