RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

There is so much expertise to enable tyre recycling facilities to be built TOMORROW in EVERY state of Australia, There are so many things that can be produced from this material.

Exactly the same applies to the recycling of most other materials currently being sent to land-fill.

As with all MAJOR issue facing our communities, it would just take the will-power and determination of those responsible for making decisions in the waste management industry to have the foresight and fortitude to ensure that full and effective investment in the recycling industry becomes the norm not the exception.

Our country needs people who can show such responsibility, allow such innovation to shine.

What we walk past is what we accept, and in this day and age we should NOT be walking past tyre mountains nor rubbish dumps, and current waste management is TOTALLY UNACCEPTABLE.

Do something now to solve our problems. Don't leave it for our children to have to deal with our rubbish.
