RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

Let's stop our recycling and waste problem by tackling the cause and not the symptom. Ban un-necessary packaging and single-use plastic. Let's move back to using natural materials for packaging and have people bringing in their own bags and containers for food etc.

Let's bring back the milkman with glass bottles.

Implement a 10c refund for cans.

We lived without plastic until the last 50 or so years- we can do it again.
