RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

Please make us responsible for recycling our own rubbish. How are we not learning from those leading in recycling? We can learn from the Nordic countries! I was disgusted to find out we send our recycling to countries less fortunate. Out of sight, out of mind? It is NOT OK to pollute other countries. We should lead by example and have the infrastructure to build our own recycling plants. Come on Australia, wake up... if you want to keep Australia beautiful.
