RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

Hello, I am writing as a passionate environmentalist. We need people willing to make tough decisions to reduce and deal with our waste issues. I would love to see a government funded advertising campaign (similar to the very effective Violence against women campaign) which heightens awareness amongst the general public about simple ways of reducing our waste. Legislation requiring businesses to take responsibility for the waste they produce is also incredibly important. Do something. Please.
