Subject: Making recycling matter

RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

Please bring back

Having bottles, cans & certain containers money back when handed back into a supplier or retailer who will accept it. This will remove this from the litter & encourage people or small business to start up!

Also let people put green composting waste into the green bin like the trial at Anglesea Victoria. People in units & small blocks will benefit as well as less in general waste.

Allow soft plastic recycling to be an extra bin or accepted in more places than the supermarkets.

Give the public more education in the types of recycling streams and the types of waste in each sort. For example bones are allowed in the green waste (as long as not too big). So many people I have met do not know this!!

Promote food markets and alternative containers!!

We need so many things to be done for this planet!!
