Subject: Reduce our consumption

RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

Why are we not more focused on reducing our consumption. There is an enormous opportunity to cut out single use plastics from food providers- coffee cups, sushi containers, water bottles etc. Large scale campaigns to do the 3 R's - starting with REDUCE first then REUSE then recycle.

Food courts with a zero waste policy, wash dishes, put pressure on Mc Donalds and take away out lets to have reusable options for dining in. Tax industry producers of single use plastics and waste. Get into schools and educate children about where our waste goes and it just doesnt disappear when we put it in the bin.
