Public housing,Rough sleeping,Housing affordability,Services,Indigenous people,Family violence,Mental health,Employment

What best describes your interest in our Inquiry? (select all that apply) :

Concerned citizen

Are there any additional themes we should consider?

YOUR SUBMISSION

Submission:

Cost benefit and analysis into all new private developments within 15km of the CBD to have minimum 20% public housing requirements. And for these homes to have access to the same amenities within the development eg: not segregated. Picked at random once the development is completed would be the best way to ensure no cost cutting and skimping by the builder/developer.

All public housing land redevelopments that are in demolition, planning or construction stages should be re assessed and not developed using the unfair "public/private" system. The state and federal government should fund and redevelop the areas to have 50/50 Public housing and build to rent so that every can live together like in Singapore which has a high social cohesion between low/middle and high socioeconomic backgrounds and religious beliefs.

Get everyone a roof and then you can start to fix the inherent problems related to family violence, drug and alcohol abuse and mental health. When people feel safe then they can work on their problems.
