YOUR SUBMISSION

Submission:

I believe that all Sex offenders names and addresses should be made available to the public to assist in protecting children and in turn preventing further offending. I believe that they lose their right to anonymity when they are convicted of a sex of fences against a minor. A clause of victims or parents of victims being allowed to contest the persons details being made public could be written into legislation. I believe that details being made public may also act as a deterrent to offenders

Are you interested in appearing before the committee in person to talk about your submission?

No
