

Security

Having the ability to track and secure a vehicle would be a valuable national security advantage as vehicles are becoming more weaponised.

The life of a Judge, a Politician or a high-profile person from the private sector or their families can make for a misguided prize for kidnappers who succumb to ideological or financial gain as their motivator. A G-Tag could thwart this criminal activity and perhaps save the life of the victim. This type of crime is inevitable and falls into the when, rather than the if, category.

The list of community safety and fiscal advantages of this proposal is, in a sense, only limited by the imagination of the reader.

The G-Tag would inevitably go down as one of the most significant achievements in public administration.
