YOUR SUBMISSION

Submission:

My 15 month old daughter is attending a childcare. One of her educators was diagnosed with Covid19. That was on early September, when Victoria was registering up to 200 cases a day or so. It took a whopping 5 full days to receive miserable sms from Dhhs that Leah has to isolate. 5 days for a kid, who only is at home or daycare, whose contact details were provided to dhhs by daycare facility at instant. There was no other communication apart of these sms messages, so I don't really have files to submit. I imagine, that it took 5 days for our simple case to trace contacts, it would rake forever for an adult, who travels between more places and.meets more ppl. If this is true, no wonder the situation with virus spread escalated so quickly. And this will happen again, if lesson wouldn't be learnt.
