### YOUR SUBMISSION

**Submission:**

I undertook a COVID 19 swab test on a Friday in July 2020 with a GP referral and did not receive my negative results until the Monday via my GP. I had to self isolate from my household during this time and could not leave the house. I was happy to take these precautions as part of the effort to stop the spread, however I didn't realise the results would take so long to come through. It would have been great to have received the results on the Saturday.
