YOUR SUBMISSION

Submission:

To "prevent criminal activity relating to the illegal cannabis trade in Victoria"

Legalise the substance for sale and use, constructing regulation based on the best available science. Prioritize education, care, and research using revenue from taxation. Further, the transparency of legal trade will naturally see prices to drop due to competition among producers and distributors. Further, legal trade will be traceable and thereby allow better targeting of education campaigns to warn users of risks (much like we do with alcohol packaging, cigarette packaging etc.) Again, based on the best available science and in comparison with other harmful substances including alcohol, tobacco, and excessive sugar or 'junk foods'.

Do you have any additional comments or suggestions?:

Consider, if you can, the substance in a new light. The war on drugs, and the misinformation around cannabis across the 20th century, should be well forgotten.
