YOUR SUBMISSION

Submission:

1st i find the terms of references very hard to understand but ill try-

I can't see any reason that full legalization of cannabis would cause harm to anyone as its the safest medicine on the planet I do realize there are recreational and medical but noone has ever overdosed and died from using cannabis alcohol is far more dangerous, I also feel more education to the public needed I don't believe in treatment programmes or mental health programme r necessary for over 21 especially if using it to replace dangerous opiods and dangerous nsaid etc and other opiod substitutes they just kill u slowly but still cannabis is last resort treatment it should be 1st resort I feel more education for drs is needed here , with recreational grown cannabis yes if under 21 a mental health program in place , full legalization is needed now especially for those who cannot afford a medical cannabis scheme aimed at the top end of town because they can only afford it while our most vulnerable living with chronic pain illnesses miss out there shouldn't have to be drs involved as they know next to nothing about this there should be a system like Canada with a proper cannabis dispensary set up run by those who have been growing for many years- the compassionate healers

Do you have any additional comments or suggestions?:

Full legalization for all over 21 before i die would be wonderful but really how backward is this country its a weed for God's sake gods gift to us - just legalize it
