Accessing and using cannabis,Criminal activity,Mental health,Young people and children,Social impacts,Education,Public health,Public safety

What best describes your interest in our Inquiry? (select all that apply) :

Individual

Are there any additional themes we should consider?

Select all that apply. Do you think there should be restrictions on the use of cannabis? :

There should be no restrictions.

YOUR SUBMISSION

Submission:

The illegal market for cannabis is enormous in Victoria, and the quality (use of Plant Hormone Growth Agent) should be a health concern in and of itself.

As a long term cannabis user, I have heavily researched the Endocannabinoid system and believe that there are significant benefits to be had from the plant (ensuring that it is cultivated correctly and without use of chemicals).

Having a brother that has succumbed to heavy ICE use and subsequent mental illness, I can directly attest that the drug landscape in Australia is terrible, liable to ensure that harder drugs are taken (pot dealer is also the heroin and ice dealer).

Other countries have shown great success with legalization of marijuana, taking this softer drug and setting it apart from the drugs that most definitely have negative health consequences. Australia has remained with its head in the sand, and we will reap the consequences of our shortsightedness as our youth are destroyed.

If we wish to have our younger generation grow into fruition without significant mental defects, we must take the production of Marijuana out of the hands of illegal growers.

Having seen the governments reaction to many issues of late (bush fires, covid) I am not convinced of their competence on any issue. Government policy freely allows adults to access booze and cigarettes (both extremely harmful) and I believe there should be no restrictions of cannabis use for those over the age of 18.
