YOUR SUBMISSION

Submission:

My friend was diagnosed with epilepsy three years ago , he was put in three different types of medications that all caused more seizures

We sourced thca oil which is the precursor to THC which has no high affect and it has kept him seizure free for two years

We can't afford legal access and our dr wouldn't refer us even though she was aware it was stopping his seizures

Seizures cause brain damage and cannabis is the only known medicine to stop a seizure while it's happening

People shouldn't have to go through brain damage and failed medications to finally get access to cannabis

The treatment my friend received made us feel like guinea pigs and completely uncared for by the government
