### YOUR SUBMISSION

Restricting access to cannabis and cannabis products under current legislation is not working in my opinion. If cannabis were to be legalised and regulated there could be a number of benefits throughout society. Revenue could be taxed, access restricted to those above legal age, criminal enterprises would lose their hold on production and sale of products and a whole new industry could be born as has happened within the US. With Cannabis being a naturally occurring substance I don't believe the current restrictions are fair on those that benefit from use of cannabis products of which there are more and more studies showing positive medical and other outcomes from cannabis use. Safe use should be promoted if legislation allowed legalisation of this wonder herb. Many civilisations over time have used and benefited from cannabis and I believe us Victorians are missing out on all the wonderful things that could come of legalisation which if not now, is bound to happen I believe sooner or later, so let's get ahead of the game and be leaders in Australia and then possibly the world in using cannabis for good

**Do you have any additional comments or suggestions?:**

**Do you think there should there be restrictions on the use of cannabis? :**

Personal use of cannabis should be decriminalised.

(Decriminalised: there are no criminal or civil penalties instead a person is referred to a drug diversion program or other health/ treatment service), Personal use of cannabis should be legal. Sale of cannabis should be legal and regulated. Cultivation of cannabis for personal use should be legal. There should be no restrictions.
