Individual

Are there any additional themes we should consider?

YOUR SUBMISSION

There are many and varied reasons why it should be legalised which are already documented. For myself personally, I don't consume alcohol anymore as my body doesn't stomach it very well so cannabis is a great alternative, I only use a small amount when I do use it just like someone drinking light beer as opposed to full strength.

I also believe it is no more dangerous than alcohol and would even be happy to suggest it creates a more relaxed environment in comparison going from my lifetimes experience. Like any other drug, however, mixed with alcohol can cause different scenarios but that to me is more due to alcoholism.

The medicinal purposes are very well documented and should not ever be ignored nor denied to those who really need better alternatives to our more scientific medications.

This would also open the door for a massive economical boost that our state (and country) need in these times whether it be through personal use, medicated uses via oils, not to mention the endless possibilities through hemp which would be enormous.

I think it is time to move with the times and legalise it.

Do you have any additional comments or suggestions?:

Do you think there should be restrictions on the use of cannabis? :

Personal use of cannabis should be decriminalised.

(Decriminalised: there are no criminal or civil penalties instead a person is referred to a drug diversion program or other health/ treatment service), Personal use of cannabis should be legal. Sale of cannabis should be legal and regulated. Cultivation of cannabis for personal use should be legal.
